C-line with Corian® Solid Surface: High Performance Laboratory Benches

**A New Generation
of Laboratory Benches**

What is C-line?

- A new cost-effective solution which allows trade professionals to compete for large scale projects
- Significantly reduces your delivery time
- Finished worktop runs include 100 mm covered upstands and a 38 mm curved downstand with anti-drip edge
- Up to 2500 mm in length
- 600 mm or 650 mm depth
- End sections also available
- Sink and bowl cut outs, drainer grooves and site joints are still required therefore C-line is only suitable for trade professionals

Quick and Cost-Effective Solutions for Laboratory Benches

C-line laboratory benches made with Corian® Solid Surface will allow you to fulfill large-scale projects in limited timescales.

A fast turnaround combined with high product quality.

This innovative production process forms a finished worktop from one single sheet of Corian® Solid Surface.

Normally, to create a coved upstand and an anti-drip front edge would involve several different fabrication processes.

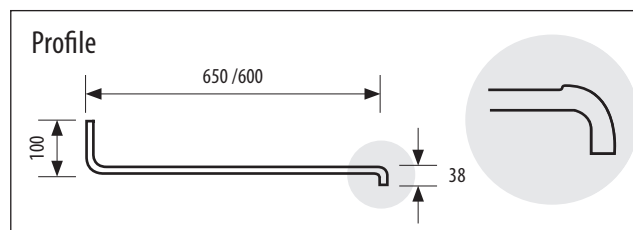

The technology behind C-line significantly reduces your fabrication time by making use of the thermoforming capabilities of Corian® Solid Surface.

The end product results in saving approximately 70% of the labour time required for fabricating a basic worktop.

The finishing touches can be added in your workshop as done with a normal worktop made with Corian® Solid Surface.

C-line worktops have been developed using the properties of Corian® Solid Surface to create a simple and effective solution with the following features and benefits:

- **Integrated coved upstand**
- **Anti-drip front edge and downturn**
- **No joints and glue lines on the upstand and downturn**
- **Increased strength and resistance compared to standard**
- **12 mm solid surface worktops**
- **Does not need a ladder frame support as with standard**
- **12 mm solid surface worktops**
- **Up to 1.5 m spans can be unsupported**
- **Easy to transport**

Many colours in the wide palette of Corian® Solid Surface can be used to make the C-line benches.*

* Some colours may show a light whitening around the curved sections. Please check before ordering.

C-line
perfect in form

Where can C-line be used?

- Healthcare
- Dental hospitals and surgeries
- Hotel vanities
- Laboratories
- Student accommodation
- Prisons
- Marine
- Armed forces accommodation
- Office fit-outs
- Kitchen worktops for large scale developments
